

Alexios-Fotios A. Mentis grew up in Athens, Greece, and graduated from "GEITONAS" Schools as a valedictorian. He then pursued undergraduate studies at the Medical School of the National & Kapodistrian University of Athens, graduating with highest honors, while he was trained at the University Hospitals of Geneva and EPFL, Lausanne, as well. Deeply enthusiastic about studying the effects of the financial crisis on population health, as well as, about the concurrent exponential advances in genomics, he studied Public Health at the National School of Public Health in Greece, as well as genomics at Johns University of Baltimore. As Onassis Foundation scholar, he aimed to unify these two fields during his Ph.D. studies which focused on deciphering the protective and risk factors of various major diseases through -omics and meta-research approaches. Alexios is also a graduate of the Bioethics program of the Bioethics Academy co-organized by the Stavros Niarchos Foundation and the Johns Hopkins University Berman Institute of Bioethics.
